BKKT 215/18 E

Thyristor Modules

BKKT 215/18 E

Features

- Heat transfer through aluminium oxide ceramic insulated metal baseplate
- Hard soldered joints for high reliability
- UL recognized, file no. E63532

Typical Applications*

- DC motor control (e. g. for machine tools)
- AC motor soft starters
- Temperature control (e. g. for ovens, chemical processes)
- Professional light dimming (studios, theaters)

This is an electrostatic discharge sensitive device (ESDS), international standard IEC 60747-1, chapter IX.

***IMPORTANT INFORMATION AND WARNINGS**

The specifications of BILTEC products may not be considered as guarantee or assurance of product characteristics ("Beschaffenheitsgarantie"). The specifications of BILTEC products describe only the usual characteristics of products to be expected in

typical applications, which may still vary depending on the specific application. Therefore, products must be tested for the respective application in advance. Application adjustments may be necessary. The user of BILTEC products is responsible for the safety of their applications embedding BILTEC products and must take adequate safety measures to prevent the applications from causing a physical injury, fire or other problem if any of BILTEC products become faulty. The user is responsible to make sure that the application design is compliant with all applicable laws, regulations, norms and standards. Except as otherwise explicitly approved by BILTEC in a written document signed by authorized representatives of BILTEC products may not be used in any applications where a failure of the product or any consequences of the use thereof can reasonably be expected to result in personal injury.
